Options for total minimum ventilation area

VENTILATION

Ventilation is required to ensure proper performance of certain products.

Possible Venting Locations:

- Space behind the cabinet
- Upper cavity (not a product cavity)
- Toe kick cavity
- Adjacent cabinetry (not a product cavity)

Cabinet with back panel or installed against a wall:
Select one of the venting locations listed above, providing the required minimum ventilation area.

Cabinet without back panel:
If the cabinet is manufactured without a back panel and is not positioned directly against a wall, the open back will provide sufficient ventilation.
